

## Rear Kit: BRLJ04R and BTLJ04R

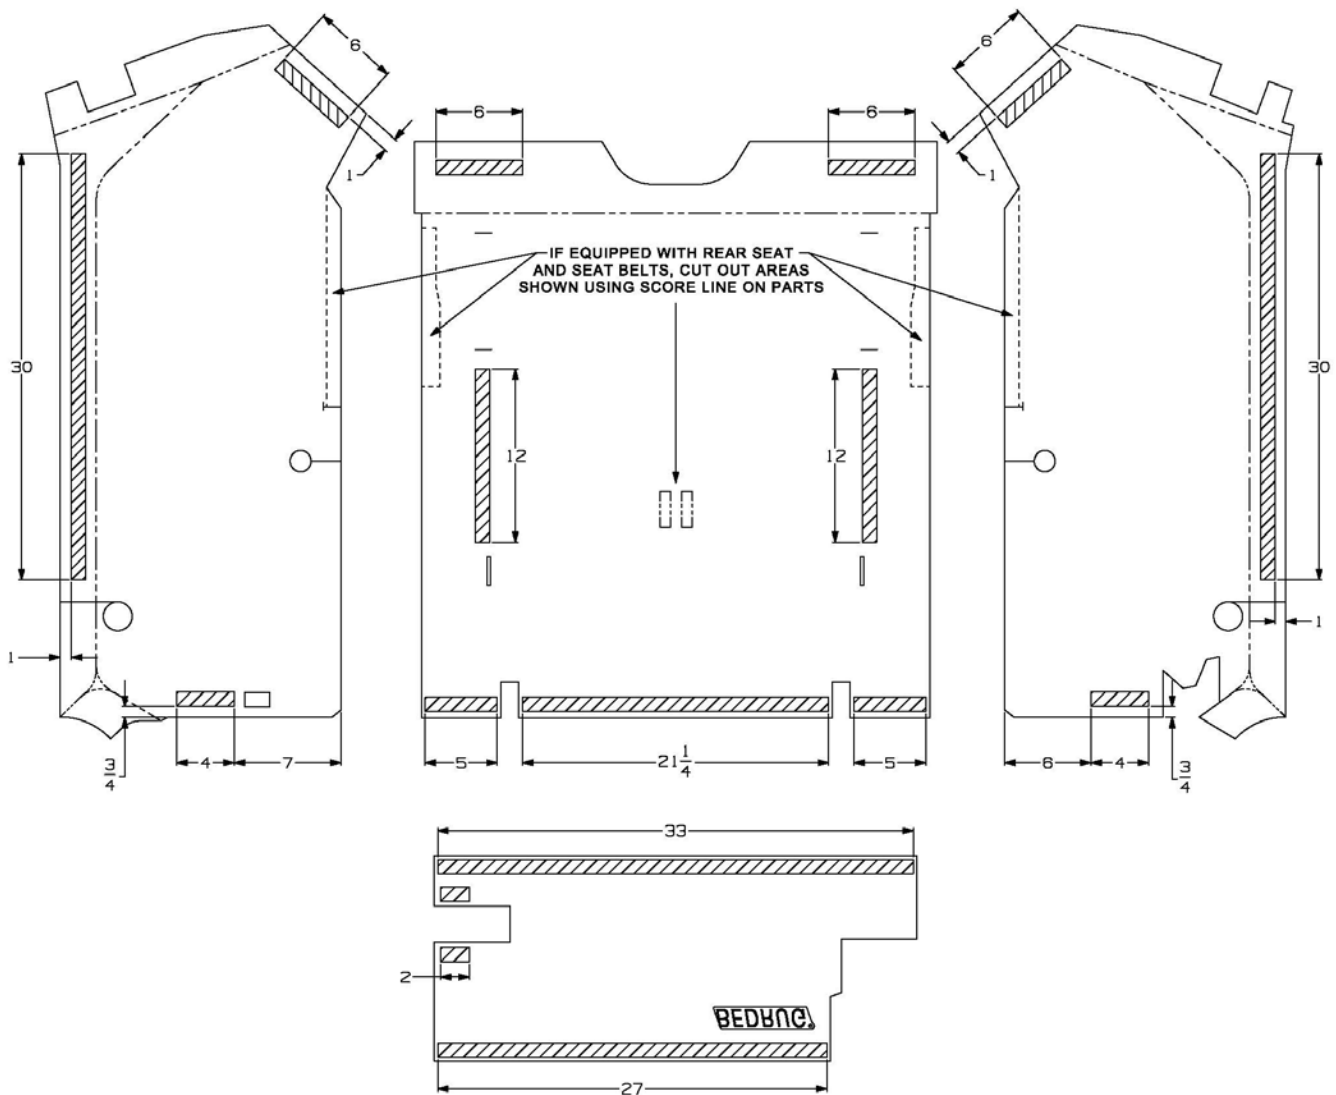

### Jeep Wrangler TJ (LJ) Unlimited BedRug/BedTred Installation Instruction Supplement

If your vehicle is equipped with rear seats, cut out the areas as indicated in the drawing below.

If tie downs are preferred to be accessible, cut holes and slits as desired using score lines on the underside of floor or cut out using your tie downs as a guide.

For BedRug hook fastener installation; cut the hook fasteners with tape backing to match the length of loop sewn on the underside of each BedRug piece. Place the hook onto each location. Do not remove the tape backing at this time. (Note: Cut the longest pieces first.)

For BedTred hook fastener installation; cut hook fasteners to length and install in locations as shown in the drawing below.

Continue with the rest of the installation following the Jeep Wrangler TJ BedRug/BedTred instructions.
